

Message from the President (2015-2018)

Prof. Dr. Tanka Nath Dhamala

It is a special honor and privilege to undertake my responsibility since August 2015 as the president of the Nepal mathematical Society (NMS). I would like to thank our valued NMS members for electing me and the NMS Executive Committee (EC). On behalf of the NMS and its EC, I would like to highly acknowledge the tremendous efforts of our predecessor presidents (Dhup Ratna Bajracharya, Ram Man Shrestha, Rameshwor Prakash Manandhar, Shankar Raj Pant, Hom Nath Bhattarai and Bhadra Man Tuladhar) and EC members and all bona fide NMS life members for bringing diversified academic activities and collaborations to the society.

The NMS has been dedicated for achieving the academic excellence in study, teaching, research and applications in mathematics. Promotion of the professional ethics, rights, welfare and increasing popularity of mathematics are the additional goals of NMS. NMS has been working in establishing academic links nationwide and abroad.

The NMS has been organizing talk programs, seminars, workshops, conferences on relevant topics with its own initiations and in collaborations with institutions of Nepal and abroad. The NMS, also member of AMS and associate member of IMU and SEAMS, welcomes the experts from abroad. It also celebrates its anniversary every year on Baishak 31 and publishes its newsletter highlighting the achievements. We feel the need to organize more programs on some crucial issues such as the role of mathematics in society, industry and various fields, developing students' interest in mathematics and simplification of mathematical concepts in teaching.

The NMS, ANMA (Association of Nepalese Mathematicians in America) and the mathematics departments of Tribhuvan University and Kathmandu University are jointly organizing the international conference AMNS-2016 "International Conference on Applications of Mathematics to Nonlinear Sciences". I would like to heartily appreciate the great efforts by all members from these organizing bodies and wish a grand success of this important event on May 26-29 in Kathmandu. This energetic NMS EC team has a vision that, there is a lot more that NMS needs to do and hence targets to increase its activities.

The society is open and believes it will get stronger and more efficient through the feedbacks and contributions of its dedicated and energetic members.

Sincerely yours,

Tanka Nath Dhamala
President, NMS
May, 2016
